

## A Mother's Right!

### Wisconsin State Statute 253.16:

A mother may breastfeed her child in any public or private location where the mother and child are otherwise authorized to be. In such a location, no person may prohibit a mother from breastfeeding her child, direct a mother to move to another location to breastfeed her child, direct a mother to cover her child or breast while breastfeeding, or otherwise restrict a mother from breastfeeding.

There is a federal regulation protecting your right to breastfeed or express milk while at work. For assistance in talking with your employer, contact us! We have Employer Toolkits Available.

### Reasons I Want to Breastfeed

Breastmilk is especially made for me, a human baby.

Breastmilk provides the right mix of fats, carbohydrates and proteins.

Breastmilk is always ready and available when I am hungry.

Breastmilk is easier for my tummy to digest than formula.

Breastmilk helps my immune system develop.

I won't get as many colds or earaches, so less trips to the doctor.

I'll have fewer cavities.

I am less likely to develop diabetes, asthma or arthritis.

Mommy is safer from breast or uterine cancer.

It is easier for mommy to lose weight.

Mommy's supply changes as I grow, always the right recipe!

Breastfeeding is good for me for as long as we want to do it.

Any amount of time that mommy breastfeeds me is great!

Mommy's milk tastes oh—so good!

“Working Together to make a difference”

## The Breastfeeding Alliance of Northeast Wisconsin

*A newborn baby has only three demands. They are warmth in the arms of its mother, food from her breasts, and security in the knowledge of her presence.*

*Breastfeeding satisfies all three.*

*~Grantly Dick-Read*

## Supporting

### Breastfeeding Mothers!

#### How:

- Breastfeeding Friendly Child Care Project: Working with childcare providers to help them become Breastfeeding Friendly by providing education and support.
- Tongue Tie Project: Held workshops for providers working with breastfeeding families to aid in identification and referral for posterior tongue and lip ties when it interfered with breastfeeding.
- Annual World Breastfeeding Week Walk: Held on the first Saturday in August.

#### Why:

- Breast milk has the right mix of fats, carbohydrates and proteins, plus antibodies to protect baby from infection! Babies are born to be breastfed!

## Our Mission & Purpose:

- To improve the health of Northeastern WI residents by working collaboratively to protect, promote, and support breastfeeding.
- To ensure that breastfeeding is the cultural norm
- To strengthen support for breastfeeding within our communities

## Membership:

Is open to anyone who supports the mission and purpose of the Breastfeeding Alliance
